**Writer's Digest 21st Annual Self-Published Book Awards** Judges Commentary - "The writing is rich with imagination, and tells an engaging story that lends itself well to the heroic fantasy quest genre. The crosscutting of scenes and viewpoints is cinematic in nature, and so this book would lend itself quite well to being filmed commercially. The setting is well realized and feels authentic, while the cast of characters are, individually and collectively, certainly strong enough to command center stage throughout the novel, and successfully engage the reader's interest in wanting to know what will happen next. This is a really entertaining plot that could very well appeal to a wide audience."
